

YACHT-FENDER-COVERS.com

YFC Covers have 2-way stretch to fit most European fender brands

Seamless - made as one piece on circular knitting machines

Made from high quality marine grade Polyester

2-way stretch achieved by addition of elastane fibre

No drawstrings at top and bottom - special knitted ends provide close fit around the ends of the fenders

**High Quality
embroidered
Club Logo
or Burgee
and Initials**

How to measure your fenders for covers:

LENGTH "L"

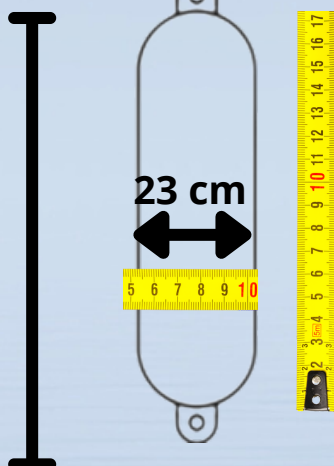

DIAMETER "D"

Example: Fender type F3 (exact dimensions vary from brand to brand)

Fender Diameter D = +/- 23 cm

Total Fender Length from 75 cm to 85cm depending on Manufacturer/Brand

75 - 85 cm

65 cm Max

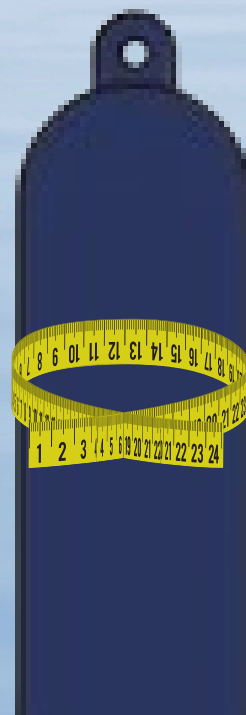

The Cover does not go over the rope holds, so Cover Length L is less than the overall fender length

Ref: 9501-D23-L65

22 - 23 cm

If measuring the CIRCUMFERENCE all around the Fender, divide result by 3.14 to get the DIAMETER

Selection chart by: Boat Length + Fender Dimensions
